

DRY VACCUM CLEANER - PSP 370A

Unique Cable Tidy

Hi - Lo Switch

This model in Black/Red colour range incorporate high performance, equipped with Two speed vacuum, two stage vacuum motor turbine linked to AutoSave energy conservation system, allowing the machine to operate automatically at the 600W Eco setting or, equally, at the 1200W high performance standard as required. This ProSave model incorporates our unique cable tidy and plugged mains cable system, extending cable life, adding user convenience and allowing for simple "unqualified" cable replacements . The power head design incorporates NST sound reduction system which together with the 600W Eco setting provides substantially lower noise levels. It also uses HepaFlo high efficiency disposable filter bags which substantially enhance performance and provide for quick, convenient and clean emptying when full. Economy and efficiency, with performance plus. Truly a tailored vacuum machine for Hotels, Hospitals and ofcourse the Contract cleaners Option
