

Single Bucket With Partition Mop wringer Trolley – HB 1812 G

The 1812 represents a super compact, truly professional dual compartment mopping unit, with our unique parabolic separator allowing a generous 18-litre front clean water container and 12-litre dirty water section to the rear.

The 60%/40% split in container capacity is genuinely practical, allowing larger areas to be cleaned before emptying and refilling is required.

For smaller applications the separator may be reversed and the press placed in its lower mounting position, resulting in a truly Xtra Compact system. In the event of a single 30-litre bucket requirement, the parabolic separator can be easily removed.

The All-Mops Press is suitable for a whole range of Kentucky and Flat mops, providing excellent performance and results.

The Structofoam Hi-Bak bucket design speaks for itself in terms of rugged reliability, running on 75mm (3") non-marking castors - ensuring excellent movement.

Colour Code options available

Model No	Capacity	Press	Castors	Size
