

Washroom Range – CPWC

Washroom problems

In washrooms, odours and infections are created by bacteria, viruses, mould, fungi and volatile organic compounds in the air and on all exposed surfaces. Fragrances or masking agents do nothing towards hygiene and the health risks remain. Cleaning and disinfecting alone are only a partial solution and cannot stop ongoing surface contamination. Poor cleaning practices can make the problem worse, as contaminated mops or cloths distribute bacteria. In eight hours a single bacteria cell can multiply into over eight million, meaning odours prevail and health risks increase.

AIRsteril kills both surface and airborne bacteria and viruses. Its efficacy was certified to do this by the Health Protection Agency.

Guaranteed odour eradication & infection control

- Reduces harmful viruses.
- Circulates fresh clean air.
- Breaks down unwanted bacteria.
- Attacks odours at their source.
- Removes unhealthy microbes from the air.
- Makes your washroom smell freshly cleaned.
- Maintains sanitized surfaces.
- Stops mould and fungi growth.
- Clears smelly compounds in the air 24/7
- Fan operation distributes throughout washroom.
- Annual lamp change maintains performance.
- Robust vandal resistant Aluminium casing.
- Wall or ceiling mountable on four screws.
- Quickly wired into fused spur.
- No filters to change.
- Guaranteed odour control

Odour and infection control in

- Public Washrooms
- High Footfall Washrooms
- Commercial Washrooms

Technical Specification

Model No.	Dimensions (L x W x H)
CPWC	150 X 100 X 420 mm
