

Washroom Range – CPWT

Washroom problems

In washrooms, odours and infections are created by bacteria, viruses, mould, fungi and volatile organic compounds in the air and on all exposed surfaces. Fragrances or masking agents do nothing towards hygiene and the health risks remain. Cleaning and disinfecting alone are only a partial solution and cannot stop ongoing surface contamination. Poor cleaning practices can make the problem worse, as contaminated mops or cloths distribute bacteria. In eight hours a single bacteria cell can multiply into over eight million, meaning odours prevail and health risks increase.

AIRsteril kills both surface and airborne bacteria and viruses. It's efficacy was certified to do this by the UK Health Protection Agency laboratories.

Washrooms are a primary source of infections including salmonella, e.coli, rhinovirus, norovirus, influenza, pneumonia, hepatitis A, hepatitis E and clostridium difficile. Many of us have our immune systems compromised at certain times meaning we are at a higher risk.

Surface to air, Airsteril takes care

- Reduces harmful viruses.
- Circulates fresh clean air.
- Breaks down unwanted bacteria.
- Attacks odours at their source.
- Removes unhealthy microbes from the air.
- Makes your washroom smell freshly cleaned.
- Maintains sanitized surfaces.
- Stops mould and fungi growth.
- Clears smelly compounds in the air 24/7.

Odour and infection control in

- Office Washrooms.
- Factory Washrooms.
- Accessible Washrooms.
- Baby Change Facilities.
- Sluice Rooms.

Technical Specification

Model No.	Dimensions (L x W x H)
CPWT	130 X 100 X 400 mm
