

Single Bucket Mop Wringer Trolley with Partition – HB 1812 G

Ergonomic Handle

Parabolic Separator

All Mop Press Wringer

Sturdy Non Marking
Castors

The 1812 G represents a super compact, truly professional dual compartment mopping unit, with our unique parabolic separator allowing a generous 18 Ltrs front clean water container and 12 Ltrs dirty water section to the rear.

The 60%/40% split in container capacity is genuinely practical, allowing larger areas to be cleaned before emptying and refilling is required.

For smaller applications the separator may be reversed and the press placed in its lower mounting position, resulting in a truly Xtra Compact system. In the event of a single 30 Ltrs bucket requirement, the parabolic separator can be easily removed.

The All-Mops Press is suitable for a whole range of Kentucky and Flat mops, providing excellent performance and results.

The Structofoam Hi-Back Bucket design speaks for itself in terms of rugged reliability, running on 75 mm (3") non-marking castors – ensuring excellent movement.

Technical Specification

Model No.	Clean Water Capacity	Dirty Water Capacity	Dimensions (L x W x H)
