

Dish Cloth – MDC

This great new invention is perfect for cleaning almost everything - Home, Car, Office, Janitorial, Boat etc. Removes wax without scratching.

The Double sided Micro-fiber cloth is over 100 times thinner than a human hair yet incredibly durable. The Micro fibers are so small that they clean away grime that other fibers simply can't detect.

A single streak free micro fiber cloth has millions of tiny 'scoops' that pull dirt, dust, oil and grease.

The results are clean, streak free shining surfaces. Close to 94% bacteria eliminated, thus more hygienic. Eliminates bad odour. Using water helps to emulsify dirt and oil making it easier for the micro fiber cloth to pick it up.

Made with the finest blend of polyester & polyamide.
