

Industrial Wet & Dry Vacuum Cleaner – WV 470-2

Twinflo

The WV470-2 provides a larger alternative to the 370-380 series, with twice the capacity but to the same high performance standard be it wet or dry.

What is very important is for professional use we do not mix both the functions of wet and dry operations otherwise the result can be a container full of almost MUD which becomes difficult to empty and will be detrimental to performance. All machines are wet or dry and the change from one to the other is designed to be simple. Exchanging a dry filter for wet safety float valve and a change of floor nozzle or vice versa.

Although twice the capacity we have added a folding handle design allowing easy movement when in use whilst also allowing compact storage.

The accessory kit provides tools for both wet and dry operations with stainless steel tube sets as standard.

All Pictures shown are for Illustration purpose only. Standard Accessories may vary.
