

Antifoaming Agent - Anti Foam

This product is not to be considered dangerous according to directive 88/379/EEC and following amendments.

ANTI-FOAM:

- ANTI-FOAM is an emulsion used for industrial and cleaning applications in order to eliminate foam.
- ANTI-FOAM is used as antifoaming agent in carpet cleaning machines. Moreover, it is used for controlling foam levels in the chemical cleaning of boilers and condenser

USE AND MEASURING:

Dilute ANTI-FOAM and add it gradually.

Normally 1 gr each 1000 cc solution is enough.

In the Foam-Rinse-Vacuum machines from Santoemma, the defoamer is automatically sucked by the machine, in the appropriate quantity.

PRECAUTIONS:

Avoid contact with eyes and skin; follow safety instructions contained in the Safety Data Sheet.

Chemical and Physical Properties

Model	Chemical Classification	Appearance and Colour	Solubility in Water	pH	Phosphorus Content
Anti Foam	Non-ionic emulsion	Liquid	Emulsifiable	7	Absent (However not Applicable Due to Product Type – (According to Regulation (EC) No 648/2004 of 31/03/2004)
Odour	Specific Weight	Biodegradability		Composition	
Characteristic	~ 1.06	> 90% (According to Regulation (EC) No 648/2004 of 31/03/2004 on Detergents)		Siliconic Anti-Foaming Agent
