

Sanitizing Foaming Detergent - SANI FOAM

PRODUCT RECOMMENDED FOR H.A.C.C.P. PROCEDURES

APPLICATIONS:

- SANI-FOAM is a detergent designed to be used with the MAXI FOAM machine.
- It is particularly indicated for cleaning water closet, washstands and tiled surfaces.
- It removes grease stains from the surfaces and sanitizes, leaving a pleasant scent in the rooms.

USE AND MEASURING:

Pure product is sucked and automatically mixed with water coming from the solution tank of the MAXIFOAM machine. The created foam must be uniformly sprayed on the surfaces to be cleaned. Foam must be left working the necessary time and then rinsed with water.

PRECAUTIONS:

Avoid contact with eyes. Follow safety instructions contained in the Safety Data Sheet.

Chemical and Physical Properties

Model	Chemical Classification	Appearance and Colour	Solubility in Water	pH	Phosphorus Content
Sani Foam	Non-ionic, Cationic Emulsion, Perfumed Essence Clear Red	Liquid	Chemical	< 13	Absent (However not Applicable Due to Product Type – (According to Regulation (EC) No. 648/2004 of 31/03/2004)
Odour	Specific Weight	Biodegradability		Composition	
Characteristic	~ 1.0	> 90% (According to Regulation (EC) No 648/2004 of 31/03/2004 on Detergents)		< 3% 2-Butoxiethanol, < 3% Non Ionic Surfactants, < 1% Sodium Hydroxide, < 1% Potassium Hydroxide
