

Dual Speed Single Disc Scrubber – C 1530

Simple to use
Operator Handle

Large Solution Tank

Transit Wheel

When it comes to large areas of floor maintenance or restoration there is no substitute for both size and weight.

Charnock, C 1530 is a dual and high speed machine with 150 and 300 RPM respectively. The dual speed of the machine is best suited especially for renewing and crystal surface treatment, carpet and floor cleaning; and low speed polishing of all kinds of floor for large scale public spaces.

Equipped with a robust motor, the machine delivers consistent torque and performance even under tough working conditions. It ensures smooth operation.

The adjustable handle, balanced weight distribution, and vibration-free operation ensure comfort and full control for the operator. Its user-friendly design reduces fatigue during extended cleaning tasks.

Ideal for cleaning in hotels, hospitals, industrial shop floors, workshops, residential and retail floor care services and Many more.

**150/300
rpm**
